

Bakht Sawai

Bakht Sawai is a 59 years old widow living with her mentally disabled daughter in single mud room house. Due to 2010 flood she had lost her goats which were the only source of income for them. At the same time her disabled daughter is a continuous challenge for her. Meanwhile SEED shelter project assessment team visited the village with the ABG for conducting gap analysis in shelters. The survey pointed her out as the vulnerable and assessed a size 12'X14'one room shelter for her and her physically challenged daughter. Series of tragedies were not over for this family. During the construction phase SEED team was informed of the sudden death of Bakht Sawai. SEED and the ABG members persuaded her son to take care of his disabled daughter now that her mother unfortunately is no longer alive to take care of her.
